

Manoj Kumar Lakshman

Expert UI Developer

Mobile: +919449358429

email: dreamweiver.manoj@gmail.com

Expert UI Developer with **14+ years** of experience leading teams to deliver scalable, high-performance web applications using React 19, TypeScript, Next.js, and Node.js.

Led cross-team architecture initiatives, establishing unified design systems, and delivering scalable, performant solutions in fast-paced, distributed environments. Recognized for combining deep technical ownership with strong facilitation and consensus-building skills.

Skills and Knowledge Areas	
Languages//Tech	Typescript, ES12+, Object Oriented Javascript , CSS3 , HTML5
Editor's	Sublime
IDE	Visual Studio 1.109,
Source control	Github, Bitbucket, TFS, VSS
Frameworks	React Js 19, Redux, Next Js, Node js, Webpack, Jest, Rx Js, Tailwind, Material Ui, Fluent Ui, Angular 20, jQuery, Require.js, lodash.js, underscore.js, Knockout.js, grunt.js, gulp JS & many more libraries.
Unit test case	Jest, React Testing Library, Qunit, Sinon.js, Jasmine

Education			
Course	Year	Institution	
B.E(ISE)	2011	PES University (Autonomous Institution under VTU Belgaum)	CGPA 7.56
Diploma (C. Sc)	2008	PVP. Polytechnic, Bangalore	75%
SSLC	2005	St Anthony's School, Bangalore	78%

Work Experience

Expert React JS Developer
SAP Labs India | Bengaluru Area, India

Oct 2019 - Present

Sap Build Process Automation

SAP Build helps create and extend AI agents and business applications in their preferred tools. Governance, roles, and clean-core alignment are built

in from the start and grounded in business context and processes.

- Spearheaded the development of complex, responsive user interfaces (UI) for the SAP Build Process Automation platform(<https://www.sap.com/india/products/technology-platform/process-automation/features.html>) in an Agile environment, leveraging React.js, TypeScript, Next.js, Tailwind, bootstrap, css3, html 5, GoJS, Redux, RxJS, jest and Node.js to deliver seamless and efficient solutions.
- Demonstrated proficiency in architecting modular, maintainable codebases, optimizing UI performance, and collaborating with cross-functional teams to drive project success.
- Developed a micro frontend architecture using Webpack via Module Federation, which provides shared tooling and optimized builds for multiple micro frontends running in a unified shell with consistent UI standards.
- Contributed to architectural decisions by designing use cases, flow diagrams, and sequence diagrams, enhancing UI functionality for React.js-based web applications.
- Release Cycle management and deploying the latest release to all Production landscapes.
- Contributed to open-source projects under SAP, including Fundamental NGX, to enhance reusable UI component libraries.
- Ensured strict compliance with UI standards and accessibility guidelines, delivering pixel-perfect, user-centric interfaces using React.js and Tailwind CSS.
- Providing technical expertise and led a team of 6 in designing and implementing scalable, high-performance web applications using modern JavaScript frameworks, with a primary focus on React.js 18.
- I was part of the hiring process, including resume screening and technical interviews for our team.
- I was actively involved in the annual performance review process for my junior team members, providing feedback on their technical knowledge and teamwork.

Technologies: React Js 18, Redux, Node Js, Next Js, Typescript 5.9.3, ES12+, TailWind, Material Ui, HTML5, CSS3, jest, react testing library, karma.js, webpack Js moment.js, lodash.js, etc.,

My day to day activities involve:

=====

1. Working in Agile Scrum Model with daily stand-up & sprint retro.
2. Developing UI Screens as per the wireframes provided by my UX designer.
3. Leading the Team with UI development and providing technical support for junior developers.
4. Authoring and Reviewing ADR documents.
5. Fixing critical to minor issues related to the UI screens.
6. Adhering to UI standards/ guidelines at all cost.
4. Constantly working on improving the UI guidelines and standards.
5. Reviewing code of fellow developers and providing constructive feedback.
6. Having healthy discussions with the UX and backend developers to improve the app on ease of use and performance front.
7. unit test case for all work flows and making sure the code coverage is above 80%.
8. Integration tests for all major feature development.

Sr Front End Developer
FICO® | Bengaluru Area, India

Jul 2018 - Oct 2019

Origination Manager

Origination Manager's Decision Module provides a powerful platform for creating, maintaining, testing and rapidly deploying critical origination decision strategies

Application was built on Micro-frontend architecture, main application was split into multiple smaller applications. I was leading 2 micro applications, one was built using Angular 7.0 and other application was built using React 16+.

Technologies: Angular 7.0, React 16+, ES6, Typescript, Redux, Rxjs, HTML5, CSS3, chimpjs, requires, jasmine, karma.js, moment.js, lodash.js, bootstrap, material Ui etc.,

Sr Front End Developer
Diconium Digital Solutions | Stuttgart Area, Germany

Feb 2018 - Jul 2018

New car online sales (NCOS) Digital commerce platform

The Digital Commerce Platform (DCP) is a Daimler e-commerce shop. New cars are not built to order, they are built to stock and ready to be bought and delivered within days. NCOS will be a combination of vehicle search

for stock cars and a checkout. The checkout is preferably the marketplace checkout.

Technologies: React 14, Redux, Typescript 2.4.2, material Ui, ES6, Webpack 2.2.1, HTML5, CSS3, jest, moment.js, lodash.js, etc.,

Environment: Node >= 4.3.0, npm >=3

Sr Front End Developer

Dec 2016 - Jan 2018

Amadeus Labs | Bengaluru Area, India

Airport IT R&D

TAM (Turnaround Activity Manager)

TAM is a Ground handling activity monitoring web app, used by airport or airline staffs to monitor the ground handling activity for any active flight in live and take preventive actions if there is any activity which is running late.

Technologies: Angular 5.0, ES6, Object oriented JavaScript, Typescript, HTML5, CSS3, webpack, jasmine, karma.js, moment.js, lodash.js, etc.,

Sr Software Engineer

Aug 2014 - Dec 2016

Veradigm (Allscripts) | Bangalore

Homecare

Allscripts Homecare is a Hybrid application which has a blend of latest features from modern web technologies and powerful IOS features of the apple iPad.

Technologies: Object oriented JavaScript , jQuery , jQuery UI, Durandal, HTML5, CSS3, LESS, jQuery, Knockout.js, Require.js, moment.js, underscore.js, C# .net , ASP .net Web Api ,MS Sql server , etc.,

Web Developer

Oct 2011 - Jul 2014

Unisys Global Services India | Bengaluru Area, India

Retail Delivery: Financial Transaction Manager

Financial Transaction Manager is a Microsoft .NET-based MVC software solution supporting a multi-channel retail delivery Environment for financial institutions. The financial-oriented transaction engine allows consolidation of transactions for all delivery channels. It is highly flexible and has been integrated with over 40 different host systems.

Financial Transaction Manager v6.1.5 product is being used by 30+ banks across the globe.

Technologies: Object Oriented JavaScript, CSS3, jQuery , jQuery UI ,C# .net ,WCF ,MS Sql server , etc.

Core Skills

Frontend : React.js 18, JavaScript , Typescript, Next js, tailwind, Material Ui, Fluent Ui, NgRx, Es12+, Angular 20, webpack, Nx, css3, html5, bootstrap etc.,

Backend/Other: Node.js, RESTful APIs, Odata APIs

Methodologies: Agile/Scrum, Accessibility (WCAG/a11y), Performance Optimization, Responsive Web Design, Reactive Programming, Technical Lead, Software Solution Architecture, Solution Architecture, Web Development, Front-End Development, Customer Support, customer incidents handling, Web Components, Cross Browser Compatibility, ADR, Copilot, Claude, Ai development, Ai prompt generation, Grok, Gemini.

Source Control: Git, GitLab, BitBucket

Unit Testing: Jest, Enzyme, React Testing Library, Jasmine, signon
